PREFACE

This Volume of 16 issue 2 reports some interesting bioactive compounds or biomolecules of natural products of Indonesia such as the exploration of urease from *Durio zibethinus* L. seeds for heavy metal determination, active compound of *Etilingera elatior* flower as antioxidant, liminoids from *Chisocheton Macrophyllus* seed as anticancer, HMG-CoA Reductase activity from soy protein hydrolysate, hepatotoxic and nephrotoxic effect of *Pimpinella pruatjan* Molk. roots and the reduction properties of *Rivina humilis* fruit extract to prepare silver nanoparticles.

Beside the natural products bioactive report, there are also computational study to predict the Scorpion Venom (*Lychas Mucronatus*) antimicrobial activity as a potential Covid-19 inhibitors. The new proposed method for contaminant of lead determination in Indonesian herbal medicine was also reported. Another report showed the Indonesian environmental issue of phosphorus fraction in the sediment of Jepara bay.

Please read the detail of the results on the website of www.jmolekul.com with fully open access including the PDF full text.

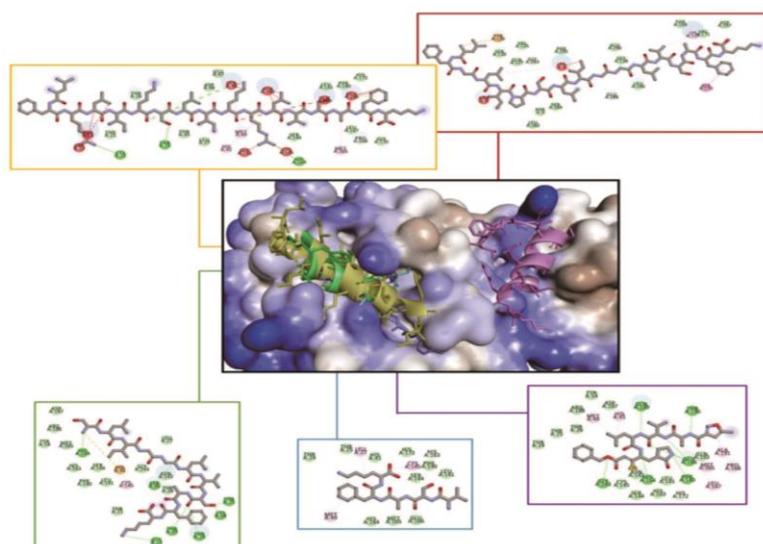

MOLEKUL is one the limited international reputable chemistry journal in Indonesia constantly maintenance the quality of published article with highly competitive submission (acceptance rate of 42% in 2020) and growing Scopus CiteScore. Welcome to all author for future edition.
